What is Lean Six Sigma?

LEAN SIX SIGMA

LEAN एक विधि है जो प्रक्रियाओं में अपशिष्ट को कम करने और कुशलता में सुधार करने पर ध्यान केंद्रित करती है। यह अक्सर Six Sigma के साथ जोडी जाती है क्योंकि दोनों विधियों का लक्ष्य गुणवत्ता और दक्षता में सुधार करना है, लेकिन उनके उत्पत्ति और दृष्टिकोण में अंतर होता है।

Six Sigma के संदर्भ में. LEAN के सिद्धांतों का उपयोग प्रक्रियाओं को संवर्धन करने और अपशिष्ट को हटाने पर केंद्रित किया जाता है। LEAN के सिद्धांतों में शामिल होते हैं:

- मूल्य की पहचानः ग्राहकों की मूल्यांकन की समझ और प्रक्रियाओं को उस मूल्य को प्रदान करने के लिए डिज़ाइन किया जाना।
- मूल्य स्ट्रीम का मैपिंगः उत्पाद या सेवा को प्रदान करने में शामिल चरणों को परिकलित करना और अपशिष्ट और असमर्थता के क्षेत्रों की पहचान करना।
- धारा बनानाः व्यवस्था के माध्यम से काम के संचालन को सुनिश्चित करना ताकि प्रक्रिया में कोई बॉटलनेक और अवरुद्धता न हो।
- पुल स्थापित करनाः उत्पादन या सेवा प्रदान को ग्राहक की मांग के साथ मेलापित करना. अधिशेष उत्पादन या अतिरिक्त भंडार को टालने के लिए।
- उत्कृष्टता का पीछा करनाः प्रक्रियाओं में सुधार के अवसरों की खोज करना और निरंतर सुधार की कोशिश करना।

Six Sigma के साथ एकीकृत करने पर LEAN के सिद्धांतों को छवि. संख्यात्मक और आंकडा खनन प्रौद्योगिकियों का उपयोग करके प्रक्रियाओं को संक्षेपित किया जाता है. जिससे कि नापसंदीदा को हटाया जा सके और उत्तम काम की विशेषता प्राप्त हो। इस एकीकरण को अक्सर Lean Six Sigma के रूप में जाना जाता है, जो Six Sigma की विश्लेषणात्मक और सांख्यिकीय उपकरणों को LEAN के अपशिष्ट-घटक सिद्धांतों के साथ मिश्रित करता है ताकि गुणवत्ता. कुशलता और ग्राहक संतुष्टि में सुधार हो सके।

LEAN SIX SIGMA

Source of image: https://leansixsigmagroep.nl/en/lean-agile-and-six-sigma/what-is-lean-six-sigma/

LEAN is a methodology that focuses on reducing waste and improving efficiency in processes. It is often associated with Six Sigma as both methodologies aim to improve quality and efficiency, but they have different origins and approaches.

In the context of Six Sigma, LEAN principles are integrated to streamline processes and eliminate waste, ultimately enhancing the overall effectiveness of Six Sigma projects. LEAN principles include:

- **Identifying Value**: Understanding what customers value and ensuring that processes are designed to deliver that value.
- Mapping the Value Stream: Visualizing and analyzing the steps involved in delivering a
 product or service to identify areas of waste and inefficiency.
- **Creating Flow**: Eliminating bottlenecks and interruptions to ensure smooth and efficient flow of work through the process.
- Establishing Pul: Aligning production or service delivery with customer demand to avoid overproduction or excess inventory.
- Pursuing Perfection: Continuously seeking opportunities for improvement and striving for perfection in processes.

When integrated with Six Sigma, LEAN principles complement the Six Sigma DMAIC (Define, Measure, Analyze, Improve, Control) methodology by providing tools and techniques to reduce waste and optimize processes. This integration is often referred to as Lean Six Sigma, which combines the analytical and statistical tools of Six Sigma with the waste-reduction principles of LEAN to achieve improvements in quality, efficiency, and customer satisfaction.

Pub. & Desc. London: Faber & Faber Limited: c2018, 348p: : 19.8cm.

ISBN 978-0-571-33875-7

Class No 823

It's all about: In an unnamed city, middle sister stands out for the wrong reasons. She reads while walking, for one. And she has been taking French night classes downtown. So when a local paramilitary known as the milkman begins pursuing her, she suddenly becomes "interesting," the last thing she ever wanted to be. Despite middle sister's attempts to avoid him—and to keep her mother from finding out about her maybe—boyfriend—rumors spread and the threat of violence lingers. Milkman is a story of the way inaction can have enormous repercussions, in a time when the wrong flag, wrong religion, or even a sunset can be subversive. Told with ferocious energy and sly, wicked humor, Milkman establishes Anna Burns as one of the most consequential voices of our day.

पुस्तक समीक्षा / BOOK REVIEW अप्रैल / April 2024

BOOK: THE OLD MAN AND THE SEA

The book that I am going to review today is considered to be a modern classic. The book was awarded the Pulitzer Prize in 1954 and the Nobel Prize for Literature in 1956.

The author of the book, Ernest Hemingway, was born in 1899 and was 53 years old when the book was published in 1952. He had worked as a reporter, Army person, Driver, and Author. He had published many other books before publishing 'The Old Man and the Sea. Some of his works are 'The Sun Also Rises'. For Whom the Bell Tolls' and 'A Farewell to Arms'. He stopped writing any book or story after writing this book. He committed suicide in the 1960s.

Storyline: The story of the book is very simple. It is a 'novella' consisting of 125 pages. The story is about an old fisherman who is 'very unlucky' as considered by his fellow fishermen who call him 'Salao' (Salty), which is considered to be the ultimate insult in terms of lucklessness. His name is 'Santiago'. For 84 days at a stretch, he had been unsuccessful in catching any fish. He has a boy whom he had kept with him during the initial period of forty days for assistance, but after that, the parents of the boy refused to let him accompany Santiago as he is not making any 'catch'. The name of the boy is 'Manolin'. He is an apprentice to Santiago and is also very attached to him since he has been fishing with Santiago since the age of

On the 85th day, Santiago decides to go to 'Gulf Stream' for fishing. Since the parents of Manolin have attached him to another fisherman, Santiago decides to go alone in the deep open sea for fishing. He takes his food & water with him too. By afternoon a fish marlin is hooked.

The old man's boat is very small and cannot take the rough jerks, and being alone on the boat, the struggle between the marlin and Santiago starts. The fish fights for two days and two nights. On the other hand, the old man also struggles with the fish with a very basic harpoon, knife, oar, and later on with a motor rotator too. His food supplies also finished.

At last, the fish dies, and the old man ties with his skiff, as his boat is too small to hold the fish and also, and he alone is not able to do that. The old fisherman now has to go a long way to reach the shore. Due to bleeding Marlin the sharks are attracted and the old man again has to save his fish from the attack of sharks. He kills five sharks but at night a school of sharks attack Marlin and he realises all the flesh has been eaten by the sharks and only the skeleton, head & tail of Marlin fish remains tied to his boat.

The old man reaches the shore early morning and goes to sleep in his shack. He is too tired to do anything. Manolin the young boy takes care of him and he says that he will accompany Santiago for future fishing trips. He also repents that had he accompanied Santiago he would have been successful in getting the fish to shore as both together will be able to

Other fishermen and tourists too are meanwhile amazed at the size of remains of the 18 ft fish tied at the skiff of old man. The old man sleeps peacefully dreaming of lions.

Characters – There are two main characters:

- 1.) Santiago His character has many shades, he is patient, and courageous. Doesn't think much about what others day. He has grown very old but still is adventurous.
- 2.) Manolin The apprentice is a very loving and friendly boy. He values his friendship above anything. He looks after Santiago even when his parents attach him to some other fisherman.
- 3.) Marlin The fish is also one of the characters. Santiago addresses him with respect as 'Brother' many times. The spirit of the fish to fight for life is indeed very exemplary.

The novella is a classic of the modern day there are several hidden messages in the book.

Conflict - The conflict is of two types depicted in the character of Santiago - Conflict with self and with others, how he overcomes.

Patience – The patience being observed by Santiago is very rare.

Courage – Despite being alone on the 85th day onwards the courage with which Santiago handles the situation is something to be seen and admired.

Weakness - Though there are several hidden messages in the book but it's easy for a reader to miss out or those messages. The story is very simple and sometimes goes to the extent of boring too.

Conclusion – The book is very small in size but gives a lot of lessons. The book can be easily finished in one sitting.

I will suggest that we should read the book due to the several lessons that are hidden in the pages. These are three movies also which have been made based on the book. One of them is an animated movie too. This book is part of the text curriculum of schools also in some countries.

Recommendation - A must-read especially for young adults to raise the spirit of Never Say Die, lastly, in the words of Santiago the book can be concluded in the sentence — "A man can be destroyed but can never be defeated".
